### Propagation Watch

Solar activity levels to very near the theoretical minimum at the start of the month. Solar flux registered 67, and the sun was completely spotless. The good news is that we expect solar activity to pick up considerably during the next two weeks.

A recurrent coronal hole will probably disrupt propagation through the high latitudes during the next few days, but following that, we look for a sharp decline in geomagnetic activity, combined with a substantial increase in solar flux. This translates into good news for the DXer, who can expect better signal-to-noise ratios, longer openings, and better long-path and polar-path openings. We enjoyed some excellent conditions in mid-April; be sure to take advantage of an repeat this month, before we move into summertime band conditions soon.

15 meters should be open on some paths if the flux goes back above 90. Try CQs in likely directions: southeast in the morning and southwest in the afternoon. 17 meters should also provide good DXing, but 20 meters remains as the main DX band. 30 meters is open more than reports suggest, and the long path on 40 remains productive. Good hunting!

## The RSGB Prefix Guide

The Radio Society of Great Britain has recently published the *RSGB Prefix Guide*, building on the long-term efforts of Geoff Watts, who died last year. The 30-page, spiral-bound Prefix Guide includes DXCC listing by prefix, ITU prefix allocations, CQ and ITU zones, latitude and longitude, previous country names, deleted countries, a complete guide to the Russian and CIS countries, DXCC country changes since 1987, and much more. The Prefix Guide is available from the RSGB at Lambda House, Cranborne Road, Potters Bar, Hertfordshire, EN6 3JE, for £6.75, including airmail postage outside of Europe.

## World Top Band Frequency Allocation Tables

The latest version of Dennis Peterson N7CKD's list of the 160-meter allocations for every current ARRL country is now available from Dennis for US\$6.50 for stateside DXers, US\$7.50 for Canadians, and US\$8.50 for DX. US funds only, please. Contact Dennis at 4248 A St. SE, Auburn WA 98002. [The earlier announcement had omitted the shipping and handling charges. -ed.]

## New Callsigns for Alaska, Hawaii, and Puerto Rico

The ARRL Letter reports that the FCC has gone along with a 1993 ARRL request to provide additional callsigns for amateurs in Alaska, Hawaii, and Puerto Rico. Alaskan amateurs will be able to get any AL, KL, NL, or WL call, not just those with the numeral 7. (KL9KAA-KL9KHZ are reserved for US personnel in Korea.) Hawaiian amateurs will get AH7, KH7, NH7, and WH7, with Kure Island being noted by a K in the first letter of the suffix. Puerto Rico amateurs gain use of KP3, NP3, and WP3 prefixes. No timetable has been announced for when these new prefixes will be available.
